PROFESSIONAL PROFILE

Software developer specializing in Python, Artificial Intelligence, data analysis, and process automation. Holds a Master's degree in Data Science and Big Data with AI.
I am currently developing iAtlas, an accounting automation SaaS, working on document processing, data extraction and transformation, workflow automation, and the application of AI to business processes.

PROFESSIONAL EXPERIENCE

2025-Present

iAtlas — Software developer / AI & Data

- Development and leadership of an intelligent automation SaaS product aimed at professional firms and administrative service agencies.
- Development of process automation solutions using Python, data analysis, and Artificial Intelligence.
- Information processing and extraction from documents and unstructured data.
- Automation of tasks related to invoice management and processing.
- Design of workflows to transform unstructured information into usable data.
- Development of tools to reduce manual tasks and improve business process efficiency.
- Development and evolution of a proprietary technology product, from problem identification to implementation.
- Analysis and resolution of technical issues related to data, automation, and information processing.
- Consulting and ad-hoc data processing: Excel/CSV cleaning and transformation, file merging, deduplication, report automation, PDF data extraction, Python scripts, and dashboards.
